

20260427 On 250 Years of History in One Paragraph

What happened in the last 250 years? A group of deceptive kleptomaniacs lied to all of the people settling the new land of America and the indigenous people that inhabited the land before they arrived. Then, they faked a 'victory' for the 'history' and the 'glory', and proceeded to establish their secret club of co-conspirators within positions of authority and influence all across the new land. Piece by piece they stole our talent, our opportunity, and our lives. Now, these same criminal co-conspirators have blocked their own 'people' from that 'kingdom' (read 'queendom') and are continuing to steal from us as their subjects (subject to their criminal and illegal use of power). Mark this day in history. I solved it. Stop being fooled. Stop playing along with this charade. These are criminals stealing my life and yours.
